

## Windows XP DHCP setup

To configure your high speed connection on Windows XP please follow these steps.

1. Click on **Start**, and then **Control Panel**.
2. On the left panel, if you see the option  **Switch to Classic View**, click it once, and it will change to "Switch to Category View".
3. Double click on the **Network Connections** icon.
4. Right click on the icon named **Local Area Connection** and from the menu that appears, select **Properties**.
5. Double Click on **Internet Protocol (TCP/IP)**, and place a dot beside BOTH **Obtain an IP address automatically . . .** and . . . **Obtain DNS server address automatically**.
6. Click on **OK** and then **OK** again on the next screen to save your changes.
