

Windomnet SW Stream App for Video services — Recommended Streaming Devices

(As of October 24, 2025)

To enjoy the best experience with the SW Stream app, Windomnet recommends using streaming devices that have at least 1 GB of memory (RAM). This list may change as new devices become available.

Roku Devices

- **Roku Ultra / Ultra LT** (Model Number 4800X)
- **4K or 8K Roku TVs** (Model Numbers A000X, C000X, G000X, E000X, J000X, 7000X)
- **Roku Express 4K / 4K+** (Model Numbers 3940X2, 3941X2)
- **Roku Streaming Stick 4K / 4K+** (Model Numbers 3820X2, 3821X2)
- Best-effort support older models such as Premiere, Ultra (Model Numbers 4640X–4670X), and Roku 3.*

Amazon Fire TV Devices

- **Fire TV / Fire TV Cube** (2nd Gen, software v7 or newer)
- **Fire TV Stick 4K** (1st Gen or newer)
- **Fire TV Stick 4K Max** (2nd Gen or newer)

Android Devices

- **Phones/Tablets** (Android version 5 or newer)
- **Android TV** (version 7 or newer)
- Android devices may vary widely — tested on reference models, but performance can differ depending on brand or hardware.

Apple Devices

- **Apple TV** 3rd Gen or newer (tvOS 14.5+)**
- **iPhone** 6 or newer (iOS 12.4+)**
- **iPad** 3rd Gen or newer (iOS 12.4+)**

Important Notes

- This list applies only to the SW Stream app. Each device uses its own built-in video player, so playback issues on older devices may be due to the device's video compatibility, not the app itself.
- This list is a general reference and not a full catalog of supported models.
- TV manufacturers may change model numbers, hardware or software versions over time.
- Always check your TV's user manual or specifications for accurate compatibility details.
- *Roku devices older than Roku 3 may still work, but are supported only on a best-effort basis.
- **Apple devices must be running iOS 12.4 or higher.
